

NXG-PI-QAM-S

SECURE PRO:IDIOM® ENCRYPTION MODULE FOR QAM (MPTS)

KEY FEATURES

- » Adds digital content protection for QAM video delivery
- » Supports SPTS format
- » Reliable, secure way to protect digital HD content
- » Supports up to 144 programs w/ Pro:Idiom® license

PRODUCT OVERVIEW

The **NXG-PI-QAM-S** inputs MPEG-compliant transport streams through the NXG IP backplane to add Pro:Idiom encryption to a multiple program transport stream (MPTS) format. The Pro:Idiom encrypted video content is routed via the NXG IP backplane to the desired QAM outputs for distribution. The **NXG-PI-QAM** is designed for compatibility with only the NXG QAM Modulator module.

The Pro:Idiom encryption is compatible with existing Pro:Idiom decryption devices, such as TV and set-top-boxes most commonly used in Hospitality locations.

Service Operators must obtain a Zenith Electronics' Pro:Idiom Service Provider License or equivalent rights to be approved to purchase, deploy and/or operate this technology.
