

POWER SUPPLIES SHIPPED WITH AMPLIFIER PRODUCTS

This document addresses differences between the artwork of the affected products and their relation to the power supply provided with each unit.

ISSUE OVERVIEW

The power requirements for the power supply units (PSU), which are shipped with a wide range of our amplifiers, have recently been updated. The PSU that is currently shipped with these products (CTI #25-2062BT 30V) is an approved replacement for these amplifiers.

This PSU covers the following list of amplifiers and includes the FRDA, BIDA lines (and the older RMDA 86A model) that are currently being sold and/or have been sold within the past 4-5 years.

For any further concerns, please contact our technical support at techsupport@blondertongue.com.

MODELS	STOCK #	ISSUED ON
