

## POWER SUPPLIES SHIPPED WITH AMPLIFIER PRODUCTS

This document addresses differences between the artwork of the affected products and their relation to the power supply provided with each unit.

### ISSUE OVERVIEW

The power requirements for the power supply units (PSU), which are shipped with a wide range of our amplifiers, have recently been updated. The PSU that is currently shipped with these products (CTI #25-2062BT 30V) is an approved replacement for these amplifiers.

This PSU covers the following list of amplifiers and includes the FRDA and BIDA lines that are currently being sold and/or have been sold within the past 4-5 years.

For any further concerns, please contact our technical support at [techsupport@blondertongue.com](mailto:techsupport@blondertongue.com).
