

POWER SUPPLIES SHIPPED WITH AMPLIFIER PRODUCTS

This document addresses differences between the artwork of the affected products and their relation to the power supply provided with each unit.

OVERVIEW

The power requirements for the power supply units (PSU), which are shipped with a wide range of our amplifiers, have recently been updated. The PSU that is currently shipped with these products (CTI #25-2062BT 30V) is an approved replacement for these amplifiers.

This PSU covers the following list of amplifiers and includes the FRDA and BIDA lines that are currently being sold and/or have been sold within the past 4-5 years. This change has been in effect since 2019.

MODEL SERIES	STOCK #
BIDA 5400 Series (550 and 750)	5400 Series
BIDA 5800 Series (100A, 86A, 75A, and 55A)	5800 Series
BIDA 5900 Series (100B and 86B)	5900 Series
FRDA 7400 Series (S4A)	7400 Series

INSTALLATION NOTES

When installing the power supply with the amplifier, the U-clips attach to the power terminal block in any direction. There is no specified positive (hot) connection.
